RE: Village of Western Springs Section 106 Notice for 5100 Woodland Avenue and 4048 Western Avenue

Dear Mr. Marrs,

Joe Farwell forwarded to me your October 22, 2020 communication to him regarding a Section 106 notice that was recently sent to your client, the Village of Western Springs. Please be aware that going forward, all legal correspondence should be sent directly to me, as I am handling all legal issues relating to this matter.

As you know, earlier this year Verizon was in open dialogue with Western Springs regarding the negotiation of a master pole attachment agreement governing small wireless facilities on municipal assets. In late March, I sent you a letter confirming Verizon would seek to work with the Village before filing small cell permit applications in light of the COVID-19 pandemic and the constraints it placed on local governments. Verizon has not submitted any small cell applications since that time, nor does it have any immediate plans to do so.

Although Verizon is not filing for small cell permits at this time, it continues to plan for future deployments, which may include various regulatory filings or other due diligence that must be completed well in advance of siting as a condition of our FCC licensure. The Village may, from time to time, receive notices of those filings where required by law. These notices are independent from, and unrelated to, the Village's permit application process.

Rest assured that Verizon will not file for small cell permits without first discussing it with the Village. Verizon is committed to bringing enhanced, state of the art, wireless services to its customers in the Village, many of whom have expressed their support of, and need for, this technology.

Please contact me with any further questions.

Sincerely,

Angie Frye
