September 24, 2021

Dear Resident,

This letter is to inform you that weather permitting the contractor (G&M Cement Construction) will begin concrete pouring on the west side of Grand Avenue. Work will start:

7:00 a.m. Monday, September 27, 2021

Please plan for Grand Avenue from Linden Circle to Lawn Drive **to be closed from 7 a.m. to +/- 7 p.m. on Monday, September 27th**. All residents within the work zone should have their vehicles out and on the street prior to 7 a.m. No traffic will be able to travel on Grand through the project site on Monday due to the large number of concrete trucks that will be on site blocking the road. We are anticipating the contractor starting at Linden Circle and working northward. At the end of the work day we anticipate the east half of the road will reopen to one way southbound traffic.

Temporary crossings at Oak and Park

Once placed the concrete will need a few hours to harden sufficiently before foot traffic can walk across. If at all possible, please park in a location that would not require you to cross over the new concrete pavement. As soon as it is practical the contractor will place plywood over the new concrete at the Oak and Park intersections to facilitate walking across the new pavement.

Possible saw cutting work night

It is imperative that the new concrete pavement joints be saw cut a few hours after the concrete has been placed and as soon as it has hardened enough to allow for joint saw cutting to occur. This saw cutting helps the ensure the concrete will crack at the correct location (at the pavement joint). It is possible that the contractor will be on site saw cutting after 7 p.m. and as late as 11 pm. On Monday. Since the contractor is working from south to north, we anticipate possible night saw cutting will occur towards the north end of the project. We understand the noise is undesirable, however it is extremely important for the long term performance and durability of the new pavement that the joint be cut the same day when possible.

On site contact for issues:

On Monday, should any immediate concerns arise please contact the consultant project engineer Mike Hastings at 815-509-4454 or the consultant project manager Kevin Berry at 815-509-5268. Thank you in advance for your patience and we apologize for the inconvenience.

Sincerely,

VILLAGE OF WESTERN SPRINGS ENGINEERING DEPARTMENT
